HexaBreach

BEYOND LIMITS, BEYOND EXPECTATIONS

CORPORATE CAPABILITIES BROCHURE

Cybersecurity. Digital Forensics. Threat Intelligence. Cyber Resilience.

Advanced security, investigation, intelligence, and resilience services for organizations operating in complex digital environments.

CREST PARTNER | ISO 27001:2022 | GDPR COMPLIANT | TRUSTED. SECURE. RESILIENT.

WHO WE ARE

Built for Complex Cyber Challenges.

HexaBreach is a cybersecurity, digital forensics, threat intelligence, and cyber resilience company delivering technical services, managed capability, strategic advisory, and specialist investigation support.

Cybersecurity

Security architecture, Zero Trust, identity security, offensive security, cloud security, and managed detection.

Digital Forensics

Computer, mobile, cloud, and network forensics with evidence preservation and defensible reporting.

Threat Intelligence

Strategic, operational, and tactical intelligence to help organizations understand adversaries and emerging risks.

Cyber Resilience

Disaster recovery, ransomware recovery, recovery validation, identity recovery, and continuity support.

Specialized Services

Advanced mobile access, data recovery, digital reconstruction, and expert support for complex technical cases.

Training & Academics

Professional training, private cohorts, cyber labs, DFIR labs, curriculum support, and workforce readiness.

Why HexaBreach

- Deep technical capability
- Evidence-driven delivery
- Advanced specialized services
- Outcome-focused engagements

Industries We Support

- Government and public sector
- Financial services and telecommunications
- Enterprise and critical infrastructure
- Legal, education, healthcare, and insurance

PROTECT DETECT INVESTIGATE RESPOND RECOVER IMPROVE

CYBERSECURITY & SECURITY OPERATIONS

Protect Critical Assets. Detect Threats Earlier.

HexaBreach helps organizations modernize security operations, strengthen identity controls, validate defenses, and establish resilient architectures for modern threat environments.

Security & Identity

- Zero Trust Architecture
- Identity & Access Management
- Privileged Access Management
- Privileged Identity Management
- Identity Threat Detection & Response

Security Operations

- Managed Detection & Response
- Extended Detection & Response
- Cyber Threat Intelligence
- SOAR as a Service
- Threat hunting and detection engineering

Offensive Security

- Advanced Penetration Testing
- Tactical VAPT
- Red-Team Simulation
- Application Security Audit
- API Penetration Testing

Security Architecture

- Cyber Security Mesh Architecture
- Cloud security implementation
- Security control validation
- Vulnerability assessment
- Vulnerability management

Operational Outcome

Improved visibility, stronger identity protection, faster threat detection, better response coordination, and measurable reduction of security risk.

DIGITAL FORENSICS & SPECIALIZED SERVICES

Preserve Evidence. Reconstruct Events. Support Complex Cases.

HexaBreach supports organizations through high-pressure incidents, forensic investigations, evidence recovery, specialized technical cases, and cybercrime-related matters.

Digital Forensics & IR

- Incident Response
- Computer Forensics
- Mobile Forensics
- Network Forensics
- Cloud Forensics
- Compromise Assessment

Specialized Services

- Advanced Mobile Access
- Data Recovery & Reconstruction
- Digital Reconstruction
- Specialized Investigations
- Cybercrime investigation support
- Technical intelligence support

Evidence-Led Delivery

We preserve, acquire, examine, recover, and interpret digital evidence across endpoints, mobile devices, cloud platforms, networks, storage media, and enterprise systems.

When Standard Tools Are Not Enough

Advanced forensic access, technical recovery, digital reconstruction, mobile extraction, and specialist case support for complex investigations.

Ideal For

Incident response, internal investigations, litigation support, fraud cases, mobile evidence recovery, ransomware investigations, insider threats, and high-priority technical matters.

RESILIENCE, PLATFORMS & CAPABILITY DEVELOPMENT

Recover Faster. Operate Smarter. Develop Stronger Teams.

HexaBreach combines resilience engineering, advanced platforms, professional training, and academic partnerships to strengthen operational readiness and long-term cyber capability.

Disaster Recovery & Resilience

DRaaS, ransomware recovery, Active Directory recovery, recovery readiness, validation, and multi-cloud resilience.

HexaShield

Unified SOC platform for visibility, SIEM, SOAR, threat detection, investigation, and response.

HexaCore DFIR

Hybrid digital forensics and incident response platform for evidence collection, investigation, and reporting.

HexaNDR

Network Detection & Response for behavioral analytics, threat hunting, investigation, and network visibility.

HexaVision IR

Video Surveillance as a Service for cloud-managed monitoring, analytics, and operational visibility.

Training & Certification

Digital forensics, incident response, SOC operations, threat hunting, offensive security, and security engineering.

HexaBreach Academics

Academic partnerships, cyber labs, DFIR laboratories, curriculum support, instructor enablement, and workforce readiness.

Capability Development

Private cohorts, cyber ranges, enterprise workshops, bootcamps, and customized learning pathways.
