## Enterprise Security Training & Certification

# Why HexaBreach Training?

---

HexaBreach Training equips professionals to build expertise, strengthen investigations, defend organizations, and stay ahead of evolving digital threats.

## THE CHALLENGE

Cyber operations and digital investigations are increasingly complex. Teams need practical, role-aligned training backed by real workflows, trusted instructors, and certification preparation.

## THE SOLUTION

HexaBreach delivers structured hands-on training built around DFIR, SOC operations, threat intelligence, incident response, and cyber resilience.

**Globally relevant training that sharpens cyber and investigative capability.**

**10+**

Training Domains

**24/7**

Mission-Focused Cyber Readiness

# Training Pathway

---

A clear pathway to build cyber, forensic, and investigation skills with HexaBreach Training.

01

## LEARN THE BASICS

Self-paced learning hubs to build foundational cybersecurity, DFIR, and investigation knowledge.

02

## BUILD SKILLS

Hands-on training—self-paced, virtual, or in person—focused on real operational workflows.

03

## GET CERTIFIED

Certification preparation aligned to global certification bodies and vendor programs.

04

## STAY CURRENT

Refreshers and continuing learning to stay aligned with current threats, tools, and techniques.

# Learn the Basics

---

A fast, self-paced way to build foundational cyber, forensic, and investigation skills.

## Learning Hub Training

Short, on-demand tutorials inside the HexaBreach Learning Hub introduce core workflows, key concepts, and best practices for:

**HexaCore IR**

**HexaShield**

**HexaNDR**

## Start Learning

Log in to HexaBreach Learning Hub to access microcourses, guided lessons, and product-specific training.

## How to Access

Go to [www.hexabreach.com/training](http://www.hexabreach.com/training)  
Log in with your credentials  
Click “Training” → “Learning Hub”  
Browse product-specific microcourses

## HexaBreach Evidence Review Training

Self-paced training that helps learners review evidence confidently, understand forensic workflows, collaborate with investigative teams, and preserve evidence integrity.

# Build Skills

---

Advance your expertise with hands-on, instructor-led training—available in person, virtual, or self-paced—to prepare for real-world cyber operations and investigations.

## Foundational Training

Fundamentals, workflows, evidence handling, and operational readiness.

### Mobile Artifact Analysis

**Level:** Intermediate

**Length:** 2 Days (14 Hours)

**Delivery:** In-Person, Virtual

Master the essential skills for mobile device data extraction and basic analysis.

**Next Steps:** [Advanced Training](#) • [Certification Pathway](#)

Private and on-site training for selected courses is available upon request.

# Advanced Training

Expert-level analysis, advanced techniques, cyber defense operations, and certification mastery.

# Recovery and Repair Training

---

Expert physical recovery, device repair, chip-off techniques, and evidence-safe recovery workflows.

## Forensic Data Recovery Technician

Level: Expert

Length: 5 Days / 35 Hours

Delivery: In-Person

Hands-on training in damaged media workflows, evidence-safe recovery, storage handling, logical recovery, and recovery documentation.

**Next Steps:** [Chip-Off Extraction](#) • [Recovery Lab](#)

## Chip-Off Extraction & Desoldering

Level: Expert

Length: 5 Days / 35 Hours

Delivery: In-Person

Immersive training in board preparation, flash memory workflows, heat application, device handling, and evidence integrity.

**Next Steps:** [Advanced Recovery Workflows](#)

---

## Training Kits

Optional kits help students continue practicing repair, recovery, extraction, and documentation techniques outside class.

# Get Certified

---

Globally recognized certifications validate cyber, forensic, and incident response expertise.

## Computer Hacking Forensic Investigator

A globally recognized digital forensics certification pathway for professionals handling evidence acquisition, analysis, and reporting.

**Issuer: EC-Council**

**Track Requirements:**

- Digital Forensics Fundamentals
- Computer Forensics
- Mobile Forensics
- Evidence Handling & Reporting

 Certification

**CHFI validates your ability to:**

- Acquire and preserve digital evidence
- Analyze and interpret forensic artifacts
- Report findings defensibly

# Stay Current

---

Keep skills current, demonstrate ongoing proficiency, and stay aligned with the latest tools, threats, workflows, and investigative best practices.

## Certification Renewal

Many certification pathways require renewal or continuing education. HexaBreach helps professionals maintain readiness through refreshers, workshops, and updated technical modules.

## Why It Matters

- Current extraction and workflow proficiency
- Improved analysis and validation skills
- Alignment with latest threats and techniques
- Better operational and courtroom readiness

## How to Stay Current:

- Attend updated technical courses
- Complete continuing education hours
- Refresh tool and workflow proficiency
- Maintain active certification status

# HexaBreach Academics

Bringing industry-aligned cybersecurity and digital forensics training to colleges, universities, and vocational institutions.

**HexaBreach Academics** is a partnership program that provides educational institutions with curriculum, resources, guidance, and practical learning pathways to prepare students for cyber and investigative careers.

## What institutions gain:

- Real-world curriculum aligned with industry practice
- Access to learning resources and practical lab guidance
- Instructor materials and hands-on learning support
- Support from HexaBreach training experts

## Program Packages

### Cybersecurity Operations

SOC, SIEM, threat hunting, cyber defense, and incident response fundamentals for students and early-career professionals.

### Digital Forensics

Evidence handling, computer forensics, mobile forensics, reporting, and investigation workflows across modern environments.

# Training Wallet

A flexible way to purchase and manage HexaBreach Training.

## Pre-purchase training credits and use them across eligible HexaBreach courses.

Manage balances, enrollments, and usage in one place through the HexaBreach Learning Hub.

- Use credits for in-person, virtual, or self-paced training.
- Share credits across teams, departments, or institutions.
- Track usage, enrollments, balances, and planning in one place.

Ideal for organizations, agencies, and institutions training at scale.
