

HexaBreach
TRAINING

Accelerating Cyber Resilience with Impactful, Scalable Learning and Expertise

HexaBreach Training equips professionals with practical tools, knowledge, and strategies to investigate incidents, respond to threats, secure systems, and drive measurable operational impact.

WWW.HEXABREACH.COM/TRAINING

Why HexaBreach Training?

Our mission is to empower cybersecurity, DFIR, SOC, and investigation professionals with the expertise required to execute their missions confidently and efficiently.

The Challenge

Digital investigations and cybersecurity operations are complex, fast-moving, and technology-driven. Professionals need continuous learning to stay ahead.

The Solution

HexaBreach provides structured learning paths from foundational skills to advanced mastery, certification, and ongoing professional development.

Join professionals building real-world cyber capability.

15,000+

Professionals supported through practical learning, workshops, and technical programs.

40,000+

Certification-style learning outcomes delivered across forensics, SOC, and incident response tracks.

Your Expert Pathway to Digital Forensics & Cyber Resilience

HexaBreach Training delivers a scalable ecosystem that equips professionals with confidence, credentials, and operational skills.

0

Learn the Basics: Learning Hubs

Quickly build skills and maximize Security and Forensic tools with on-demand learning resources.

1

Maintain Expertise: Recertifications

Stay ahead of evolving technology with ongoing education and recertifications-ensuring you uncover the truth with confidence.

2

Deepen Your Skills: Mastery

Advance your expertise with immersive, blended learning-combining pre-work, live instructor-led sessions (In-Person or Virtual), or self-paced content.

3

Gain Recognition: Certification

Earn globally recognized certifications to validate your expertise, enhance career growth, and strengthen investigative skills.

Learn the Basics: Learning Hubs

Master HexaBreach tools and investigative workflows with on-demand tutorials, expert guidance, and practical insights available whenever you need them.

Bring Expert-Led Training to Your Team

Deliver practical, role-based training directly to your organization. Our private training engagements can be customized for investigators, SOC analysts, incident responders, forensic examiners, security teams, legal professionals, and executive stakeholders.

Courses can be delivered onsite, remotely, or in a hybrid format and include hands-on exercises, labs, case studies, certification pathways, and tailored learning outcomes aligned to your operational objectives.

[Custom Curriculum](#)

[Certification Tracks](#)

[Hands-On Labs](#)

HB

Mobile Artifact Analysis

Level: Intermediate

2 Days (14 Hours)

Virtual Live

Master the essential skills for mobile device data extraction and basic analysis.

HB

Mobile Artifact Analysis

Level: Intermediate

2 Days (14 Hours)

In-Person (Nairobi) (Nairobi)

Master the essential skills for mobile device data extraction and basic analysis.

HB

Mobile Artifact Analysis

Level: Intermediate

2 Days (14 Hours)

In-Person (New York)

Master the essential skills for mobile device data extraction and basic analysis.

Master Advanced Forensic Investigation With Hexabreach

Develop the practical skills required to detect, investigate, contain, and respond to modern cyber threats across enterprise, cloud, and hybrid environments.

HexaBreach Digital Forensics Fundamentals

HDF

Entry

2 Days / 14 Hours

In-Person, Virtual, Self-Paced

Introduces digital evidence handling, forensic workflows, acquisition concepts, file systems, mobile and computer evidence fundamentals, and reporting basics.

HexaBreach Incident Response Operator

HIR

Intermediate

3 Days / 21 Hours

In-Person, Virtual

Builds hands-on capability for triage, containment, root cause analysis, evidence preservation, incident timelines, and executive incident reporting.

HexaBreach SOC Analyst Training

SOC

Entry

2 Days / 14 Hours

Virtual, Self-Paced

Covers SOC monitoring, alert triage, detection logic, escalation workflows, case management, and threat-led investigation.

Powered by Real-World Operations

Training is aligned to real-world forensic investigation workflows, digital evidence handling procedures, chain-of-custody requirements, artifact analysis, case reconstruction, and defensible reporting practices to ensure investigative accuracy, evidence integrity, and court-ready outcomes.

Master Advanced Forensic Investigation With Hexabreach

continued

Advanced Mobile Forensics

HMF

Advanced

5 Days / 35 Hours

In-Person

Explores advanced mobile extraction, app artifact analysis, encrypted data handling, timeline reconstruction, and report preparation.

Cyber Threat Intelligence Analyst

CTI

Intermediate

3 Days / 21 Hours

Virtual, In-Person

Teaches intelligence lifecycle, collection planning, source validation, dark web monitoring, adversary profiling, and intelligence reporting.

Forensic Data Recovery Technician

DR

Expert

5 Days / 35 Hours

In-Person

Hands-on training in storage media handling, logical recovery, damaged device workflows, evidence-safe recovery, and documentation.

Master Investigative Analytics with **Threat Intelligence**

HexaBreach Cyber Threat Intelligence Analyst

Level: Intermediate

3 Days / 21 Hours

Virtual, In-Person

Harness intelligence-driven workflows to analyze digital evidence, enrich cases, visualize relationships, identify adversary infrastructure, and turn raw data into actionable investigative intelligence.

Master Cyber Security Operations With Hexabreach

Develop the practical skills required to detect, investigate, contain, and respond to modern cyber threats across enterprise, cloud, and hybrid environments.

SOC Analyst Fundamentals

SOC

Entry

3 Days / 21 Hours

Virtual, In-Person, Self-Paced

Introduces security monitoring, alert triage, case management, event correlation, escalation procedures, and SOC workflows.

Incident Response Operations

IR

Intermediate

4 Days / 28 Hours

Virtual, In-Person

Develop practical incident handling skills including triage, containment, eradication, recovery, root cause analysis, and executive reporting.

Threat Hunting & Detection Engineering

TH

Advanced

5 Days / 35 Hours

Virtual, In-Person

Build proactive threat hunting programs using behavioral analytics, threat intelligence, detection engineering, and adversary emulation techniques.

Network Detection & Response Specialist

NDR

Advanced

4 Days / 28 Hours

Virtual, In-Person

Investigate network-based attacks, lateral movement, command-and-control communications, and advanced attacker behavior across enterprise environments.

Powered by Real-World Operations

Training is aligned to modern SOC workflows, incident response operations, threat intelligence programs, and enterprise security architectures to ensure immediate operational impact.

Master Cyber Security Operations With Hexabreach continued

Cyber Threat Intelligence Analyst

CTI

Intermediate

3 Days / 21 Hours

Virtual, In-Person

Learn intelligence collection, adversary profiling, dark web monitoring, threat actor attribution, and strategic intelligence reporting.

Cloud Security & Incident Response

CLOUD

Advanced

4 Days / 28 Hours

Virtual, In-Person

Secure cloud workloads and investigate incidents across AWS, Azure, Google Cloud, and hybrid enterprise environments.

Security Operations Leadership

SOL

Expert

3 Days / 21 Hours

In-Person, Virtual

Design and manage mature security operations programs, governance frameworks, KPIs, incident response teams, and cyber resilience initiatives.

Security Information & Event Management

SIEM

Intermediate

4 Days / 28 Hours

Virtual, In-Person

Master SIEM architecture, log management, correlation rules, use-case development, dashboard creation, and incident investigation workflows.

Master Cyber Security Operations With Hexabreach continued

Ransomware Defense & Recovery

RDR

Advanced

3 Days / 21 Hours

Virtual, In-Person

Understand ransomware operations, prevention strategies, containment procedures, recovery planning, and resilience best practices.

Master Forensic Recovery & Repair Techniques

Forensic Data Recovery Technician

Level: Expert

5 Days / 35 Hours

Gain hands-on experience in evidence-safe recovery, damaged media workflows, storage handling, logical recovery, and documentation.

Hardware-Assisted Recovery Lab

Level: Expert

In-Person

Practice device repair, evidence preservation, extraction preparation, and recovery workflows for damaged or inaccessible data sources.

Training Kits

Specialized kits may include recovery adapters, workspace protection, soldering tools, device repair accessories, and lab materials.

Advance Your Career: Certification Pathways

HexaBreach partners with leading global technology vendors, certification bodies, and professional training organizations to deliver authorized training, certification preparation, and professional development pathways for cybersecurity, digital forensics, incident response, and threat intelligence professionals.

Authorized Training Delivery

Our instructors deliver vendor-approved curricula, hands-on labs, examination preparation, and certification guidance to help learners build practical skills and successfully pursue globally recognized industry credentials.

DFIR

Digital Forensics Certification Pathway

Designed for investigators, forensic examiners, and law enforcement professionals seeking formal certification in digital evidence acquisition, analysis, and reporting.

HexaBreach Preparation Track

Digital Forensics Fundamentals

Computer Forensics

Advanced Mobile Forensics

Forensic Data Recovery

Certification Exam

Preparation for globally recognized digital forensics certification examinations.

IR

Incident Response Certification Pathway

Develops practical capabilities in cyber incident handling, containment, recovery, root cause analysis, and operational response.

HexaBreach Preparation Track

SOC Analyst Fundamentals

Incident Response Operations

Threat Hunting & Detection Engineering

Certification Exam

Preparation for incident response and cyber defense certification programs.

Advance Your Career: Certification Pathways continued

CTI

Cyber Threat Intelligence Certification Pathway

Equips analysts with the skills required to collect, analyze, operationalize, and communicate actionable threat intelligence.

HexaBreach Preparation Track

Cyber Threat Intelligence Analyst

Threat Hunting & Detection Engineering

Network Detection & Response Specialist

Certification Exam

Preparation for threat intelligence and adversary analysis certification programs.

SOC

SOC Operations Certification Pathway

Builds expertise in security monitoring, detection engineering, alert triage, investigation workflows, and SOC operations.

HexaBreach Preparation Track

SOC Analyst Fundamentals

SIEM Operations

Network Detection & Response Specialist

Certification Exam

Preparation for security operations and monitoring certifications.

Advance Your Career: Certification Pathways continued

CLOUD

Cloud Security Certification Pathway

Focuses on securing cloud workloads, identity management, cloud governance, and cloud incident response.

HexaBreach Preparation Track

Cloud Security Fundamentals

Cloud Security & Incident Response

Cloud Threat Detection

Certification Exam

Preparation for cloud security certification programs across major cloud platforms.

LEAD

Security Leadership Certification Pathway

Designed for managers, team leads, and executives responsible for cyber strategy, governance, and operational resilience.

HexaBreach Preparation Track

Security Operations Leadership

Cyber Risk Management

Security Governance & Compliance

Certification Exam

Preparation for security leadership, governance, and management certifications.

Global Certification Ecosystem

Training pathways may align with certifications from leading cybersecurity, digital forensics, cloud security, incident response, governance, risk management, and threat intelligence organizations, depending on course availability and regional authorization.

Build Capability Across Domains: Training Designed for Operational Roles

HexaBreach training paths are organized around the core domains required to prevent, detect, investigate, respond to, and recover from cyber incidents.

Level	Level Summary	Digital Forensics & Investigations	Cyber Security Operations	Threat Intelligence & Response	Recovery & Resilience
Foundation	Build baseline knowledge of tools, workflows, terminology, and evidence-aware operations.	Digital Forensics Fundamentals	Cybersecurity Fundamentals / SOC Analyst Basics	Threat Intelligence Foundations	Cyber Resilience Fundamentals
Practitioner	Develop hands-on capability for day-to-day technical operations and case work.	Computer Forensics / Mobile Forensics	SOC Analyst / SIEM Operations	Incident Response Operations	Data Recovery Technician
Advanced	Strengthen specialist skills for complex investigations, advanced attacks, and high-impact incidents.	Advanced Mobile Forensics / Artifact Analysis	Threat Hunting / Detection Engineering	Cyber Threat Intelligence Analyst	Ransomware Defense & Recovery
Specialist	Build expert-level capability for sensitive cases, enterprise environments, and mission-critical response.	Cloud Forensics / Expert Forensic Reporting	Network Detection & Response Specialist	Malware & Adversary Infrastructure Analysis	Forensic Recovery & Repair Techniques
Leadership	Prepare leaders to govern cyber programs, manage teams, and align technical outcomes with business risk.	Investigation Management / Legal Readiness	Security Operations Leadership	Intelligence-Led Security Program Design	Business Continuity & Incident Readiness
Certification Pathway	Prepare for globally recognized credentials through authorized partner-led training.	CHFI / Digital Forensics Pathway	Security+ / CEH / SOC Certifications	ECIH / CTI Pathways	Resilience, Recovery & Continuity Pathways

HexaBreach Training Wallet

Flexible Training Access for Teams

The HexaBreach Training Wallet gives organizations a simple way to pre-plan, allocate, and consume training across teams, departments, agencies, and institutional programs.

Instead of managing separate approvals for every course, clients can purchase training credits and apply them across eligible instructor-led, virtual, self-paced, private, and certification preparation programs.

Why Choose the Training Wallet?

- ✦ Maximize your training budget with prepaid credits.
- ✦ Track credits, usage, participation, and learning progress.
- ✦ Allocate credits to public courses or private team programs.
- ✦ Mix and match virtual, in-person, and self-paced training.
- ✦ Scale training across teams, departments, and institutions.
